

Useful Instagram Applications

Jill Coleman, @JillFit

1. **Wordswag** – Make quote cards for main feed or stories
2. **PicPlayPost** – Place multiple videos in one frame
3. **Canva** – Make Infographics
4. **Instaquote** – Create quote cards and memes
5. **Twitter** – Screenshot your twitter status and use Instasize to make it into a square and post on your main feed
6. **PicFrame** – Create side-by-side photos or multiple images in one frame
7. **Instasize** – Make everything into a square, add white space to things
8. **Camera+** - My fav filtering tool, use the Clarity filter to enhance sunsets or brighten dark photos
9. **Video 2 Photo** – Grab a still shot from a video
10. **After Focus** – Create a blur everywhere else in the photo besides the thing you want to be in focus
11. **VanillaPen** – Create quote cards with many different fonts
12. **Lapse It** – Speed up a video
13. **UNUM** – See what your image will look like on your feed before actually having to post it
14. **Audiogram** – Add voiceover to a photo, for example grab part of an interview and overlay it over the person’s photo, along with squiggly voice lines
15. **Vont** – Write words over a video
16. **Continual** – Cuts longer videos into 15-second chunks to upload to your IG story with no breaks
17. **iMovie/Final Cut Pro** – For more advanced video edits, like adding subtitles, a countdown timer, having things fly in and out, etc.
18. **Auto timer on your phone!** – You can take photos of yourself that don’t have to be selfies. I use the 3s delay timer and do a photo shoot with myself. Lol.
